

The 13th Ilan Ramon International

SPACE CONFERENCE

SPACE PLASMA PROPULSION AND TECHNOLOGY WORKSHOP

January 30th 2018, 13:30–15:30, Naftali Building Room 527, Tel Aviv University

Plasma propulsion is becoming one of the main drivers in lowering cost of space missions. In this workshop experts will present their recent research, followed by a discussion about current and future trends in this growing field, with emphasis on plasma propulsion for small spacecraft and nanosatellites.

Speakers:

Prof. Igal Kronhaus, Technion, Israel

Prof. Amnon Fruchtman, Holon Institute of Technology, Israel

Prof. Francesco Taccogna, CNR, Italy

Dr. Dan Lev, Rafael, Israel

Dr. Gennady Makrinich, Holon Institute of Technology, Israel

Dr. Matteo Laterza, Technion, Israel

Eviatar Edlerman, Asher Space Research Institute, Technion, Israel

Prof. Daniele Pavarin, University of Padua, Italy
